SUMMARY

B.Tech Computer Science student at Mumbai University with hands-on experience through two internships in AI Content Curation and CAD & Web Development.
Passionate about Software Development, AI, and continuously learning by participating in hackathons, Microsoft tech events, and industry workshops. Eager to apply problem-solving, web development, and AI skills to build impactful real-world solutions.

EXPERIENCE

Nextleap

Ai Content Curator

01/JUNE/2025 - 30/JUNE/2025 Mumbai, India

- Converted digitized content into structured HTML for web publishing.
- Identified and resolved HTML code and formatting errors to ensure accurate content rendering.
- Assisted in training Generative AI models by curating and validating high-quality content.

GPT

CAD Design & WEb Devleopment

01/FEB/2026 - 28/FEB/2026 Mumbai, India

- Created and modified technical drawings using CAD software.
- Supported frontend and backend development tasks, including bug fixing, testing, and collaborating with the team to deliver project requirements.
- Developed responsive web pages using HTML, CSS, and JavaScript.

PROJECTS

Attendance Management System Using Face Detection

- Developed a Python-based attendance system using face detection.
- Automated attendance through real-time facial recognition.
- Captures multiple attendees simultaneously with a 5-second detection interval.
- Reduces manual attendance errors and duplicate entries.
- Designed to solve real-world attendance management efficiently.

Cinema Seat Ticket Booking System

- Developed a Java-based movie ticket booking application.
- Enabled movie selection, show timings, and seat booking.
- Implemented seat availability and booking confirmation features.
- Automated the ticket booking process for a better user experience.
- Applied Object-Oriented Programming (OOP) concepts to build the system.

EcoBatch AI – AI-Based Batch Optimization Platform

- Developed an AI-powered platform for batch process optimization.
- Analyzes user-provided data to generate efficient processing solutions.
- Optimizes resource utilization to reduce waste and operational costs.
- Promotes eco-friendly and sustainable manufacturing practices.
- Designed to improve efficiency while minimizing environmental impact.

EDUCATION

Bachelor of Engineering - BE, Computer Engineering

University of Mumbai

Present Mumbai, India MAY 2027

SKILLS

Python **Java**
HTML5 **CSS3**
JavaScript
OpenCV
Generative AI
Team Collaboration

CERTIFICATIONS

Google Analytics
